## TAPESTRY SEGMENTATION PROFILE

### + WHAT IS TAPESTRY SEGMENTATION?

Tapestry Segmentation is a market segmentation system that classifies US neighborhoods based on their socioeconomic and demographic compositions. Tapestry is a system for classifying consumers and constituents using all the variables that can distinguish consumer behavior, from household characteristics such as income and family type to personal traits like age, education, or employment and even housing choices.

Tapestry Segmentation classifies US neighborhoods into 67 distinct market segments. Neighborhoods with the most similar characteristics are grouped together, while neighborhoods with divergent characteristics are separated. Tapestry Segmentation combines the “who” of lifestyle demography with the “where” of local neighborhood geography to create a model of various lifestyle classifications, or segments, of actual neighborhoods with addresses—distinct behavioral market segments.

### + WHO SHOULD USE TAPESTRY SEGMENTATION?

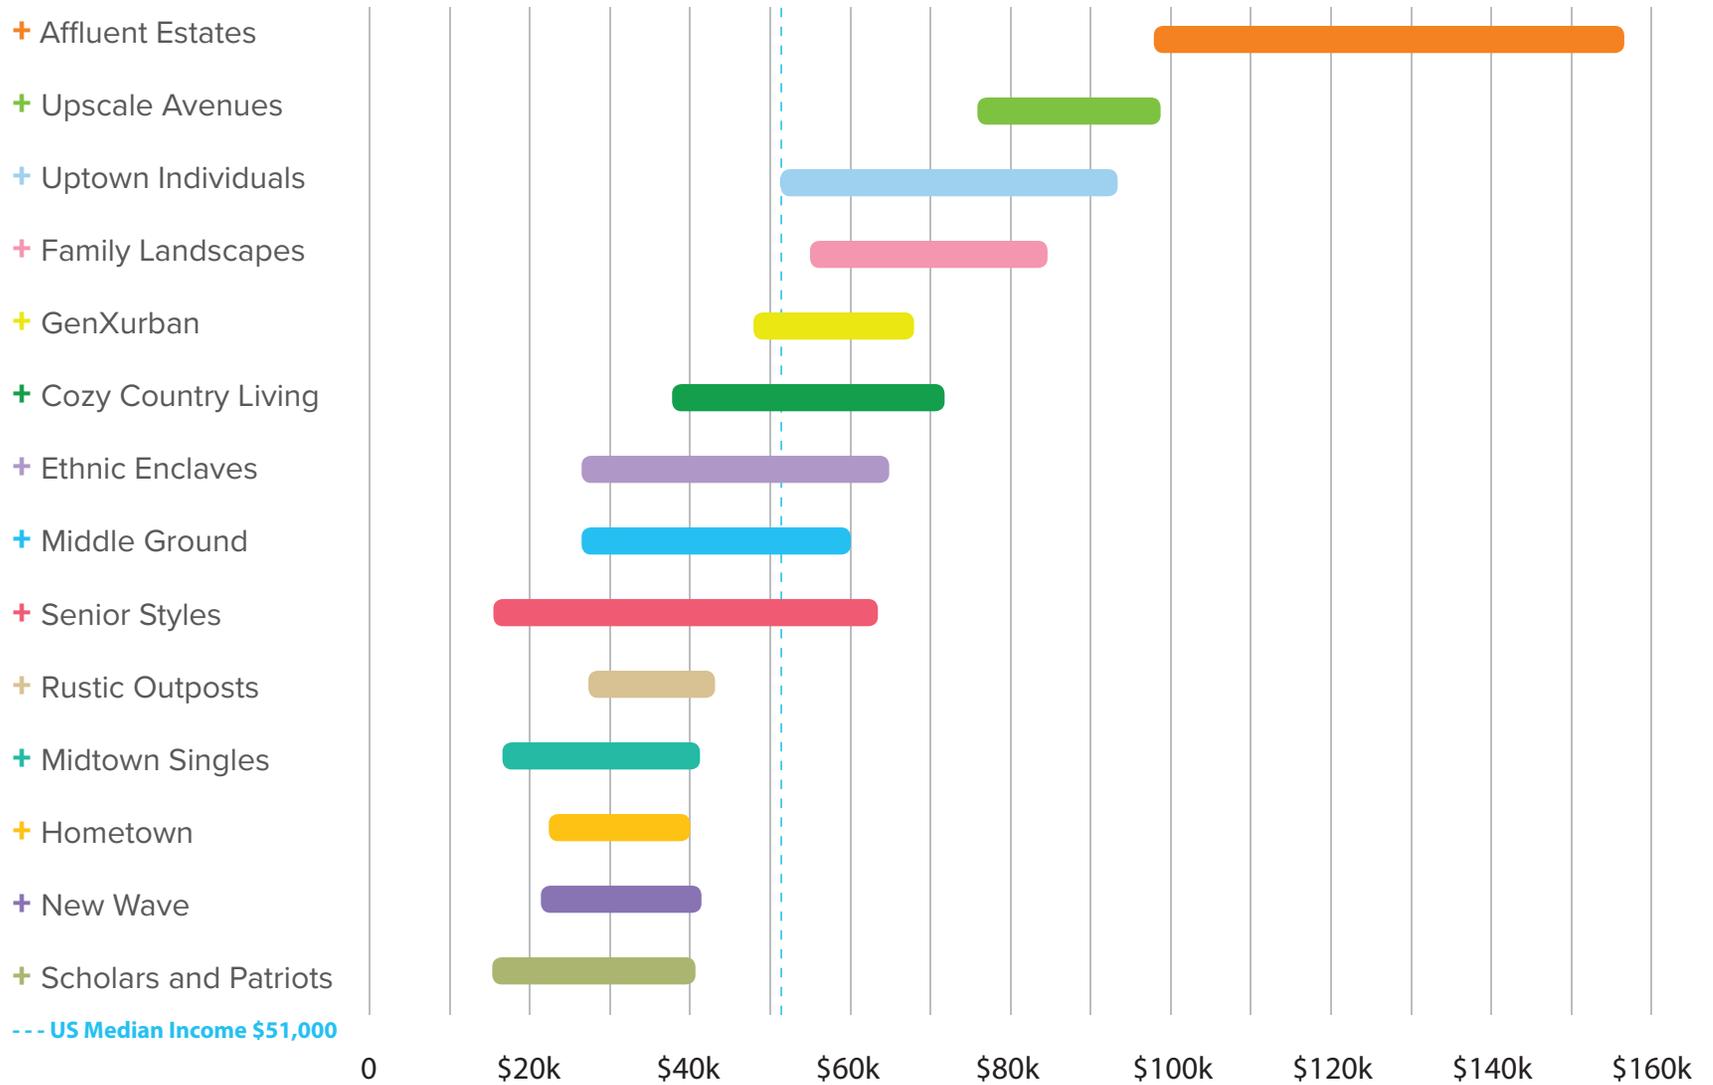

All companies, agencies, and organizations need to understand consumers/constituents in order to supply them with the right products and services and to reach them via their preferred media. These applications require a robust segmentation system that can accurately profile these diverse markets. The versatility and predictive power of Tapestry Segmentation allow users to integrate their own data or national consumer surveys into Tapestry Segmentation to identify their best market segments and reach them through the most effective channels.

### + TAPESTRY SEGMENTATION SUMMARY GROUPS

Esri’s Tapestry Segmentation provides a robust, powerful portrait of the 67 US consumer markets. To provide a broader view of these 67 segments, Esri combined them into 14 LifeMode Summary Groups based on lifestyle and lifestage composition.

# 6E RURAL RESORT DWELLERS

Although the Great Recession forced many owners of second homes to sell, Rural Resort Dwellers residents remain an active market, just a bit smaller.

These communities are centered in resort areas, many in the Midwest, where the change in seasons supports a variety of outdoor activities. Retirement looms for many of these blue collar, older householders, but workers are postponing retirement or returning to work to maintain their current lifestyles. Workers are traveling further to maintain employment. They are passionate about their hobbies, like freshwater fishing and hunting, but otherwise have very simple tastes.

- In this older market, 42% of households consist of married couples with no children at home, while another 28% are single person. Married couples with children at home have older school-age children.
- Set in scenic rural locations with proximity to outdoor activities, two vehicles are essential to get around.

## + MARKET PROFILE

*(Consumer preferences are estimated from data by GfK MRI)*

- At home, Rural Resort Dwellers residents spend any free time working on their vehicles and maintaining their gear. They make frequent trips to their local hardware store for parts and tools. These hands-on consumers are also passionate about vegetable gardening.
- Due to their remote locations, these neighborhoods have satellite dishes. A few residents still rely on dial-up modems to stay connected. They don't access the Internet often but will make online purchases for items difficult to find in nearby stores.
- Their taste in TV shows reflects their hobbies—Animal Planet, Discovery Channel, and the DIY Network.

## + SOCIOECONOMIC TRAITS

- Rural Resort Dwellers residents are close to retirement. They've accumulated wealth and begun to shift their portfolios to low-risk assets. These active residents continue to work in skilled occupations.
