- With average household size exceeding three, presence of children less than 5 years old is high compared to the US average. Dependent children represent approximately one-third of the population.

SOCIOECONOMIC TRAITS

- Female labor participation is slightly lower than the US average, partially attributable to the language barrier in this diverse foreign-born market.
- Male labor force participation (Index 116) is compulsory for these new families.
- Working full-time in blue collar jobs, this market works hard and dreams big. They seek adventure and take risks for the betterment of their families.
